- Among the projects to be presented to the Soviet/authorities by Dipl. Ing. Brunolf Baade, during his stay in Moscow from mid-April to Wearly June 1955, is a project concerning the construction of a landing and take-off basin for seaplanes to be located near the Pirns-Sonnenstein compound of the Main Administration for Industrial Bequirements. In The basin is to be located between the Elbe and its tributary, the Wesenitz, which flows into the Elbe near Pratzschwitz (opposite Pirna). For this purpose, a dam is to be constructed and the water of the Elbe River is to be held back.
- It will not be known whether or not the Soviets approved Beade's project and whether or not his plan will be carried out, antil after his return from the USSR.

THE APPRAISAL OF CONTENT IS TENTATIVE. (FOR KEY SEE REVERSE)

- The annexed sketch shows the planned location of the water basin:
  - The Elbe River. Arrow points in the direction of Dresden.
  - (2) Wesenitz, tributary of the Elbe
  - (3) Pwatzschwitz.
  - Secondary road from Pratzschwitz to Pirna-Copitz.
  - (5) Pirma-Copitz.
  - (6) Rail-and-vehicle bridge across the Elbe, connecting Pirna proper with Pirma-Copitz.
  - Pirms freight station.
  - Gottleubs, another tributary of the Ribe.
  - (9) Rail-line from Dresden via Pirna-Copitz to Lohmen.
  - (10) The terrain scheduled to be flooded with water and to serve as basin for seaplanes.
